## DETAILED ACTION

### *Specification*

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the apparatus 10 and a rear reinforced area 60a as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Features such as extraneous circles and corner text should be removed. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berry in view of Irvello.

Berry discloses the invention substantially as claimed including at least one notcher 78 and at least one shear 16. Berry doesn't show at least one dimpler. However, Irvello teaches the use of a dimpler (Fig. 7) for the purpose of making dimples on a strip to be bent. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have

modified Berry's device by providing the dimpler as taught by Irvello in order to facilitate the bending of the strip.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berry in view of Irvello.

Berry discloses the method for preparing trim cap material substantially as claimed including the step of notching said trim cap material using at least one notcher Fig.1. Berry doesn't show the step of dimpling said trim cap material using at least one dimpler. However, Irvello teaches the step of dimpling said trim cap material using at least one dimpler (Fig. 4-5) for the purpose of making dimples on a strip to be bent. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Berry's device by providing the step of dimpling said trim cap material using at least one dimpler as taught by Irvello in order to facilitate the bending of the strip.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smith et al., Welk, Loew, Bernier, Wilson and Carbaugh et al. are cited to show related device.
